Pain Points

Struggling with Snoring or Congestion?

Whether its snoring, allergies, or breathing difficulties during exercise, our nasal clip is here to help. These issues can disrupt your sleep, lower your energy, and impact your quality of life.

Clean

Clean your nose thoroughly to remove any dirt or oil from the skin. Let your nose dry completely before applying the Tabs.

Pro-Tip: Cleanse with soap and water or use an alcohol prep pad for best results.

Apply

Using the Applicator, apply one adhesive Tab to each side Of your nose. Just above the nostrils. Press each Tab onto your skin to ensure complete contact. Wait a few minutes before attaching the band.

Tab placement

There are some tips to use I-I-Will.

- Steel disc placed directly above the nostril (not on the nostril)
- Contoured indent fits around the nostril
- 100% contact with skin on the nose, not the cheek. Always be sure to apply the Tabs properly. If the Tabs aren't placed well, the Band will not attach well.

Enjoy

Place the U-will band over your nose. The magnetic ends of the Band will snap onto the Tabs.

Pro-Tip: Make sure the Band is not upside down. The magnets should be facing down.

What's in start kit

4 Bands

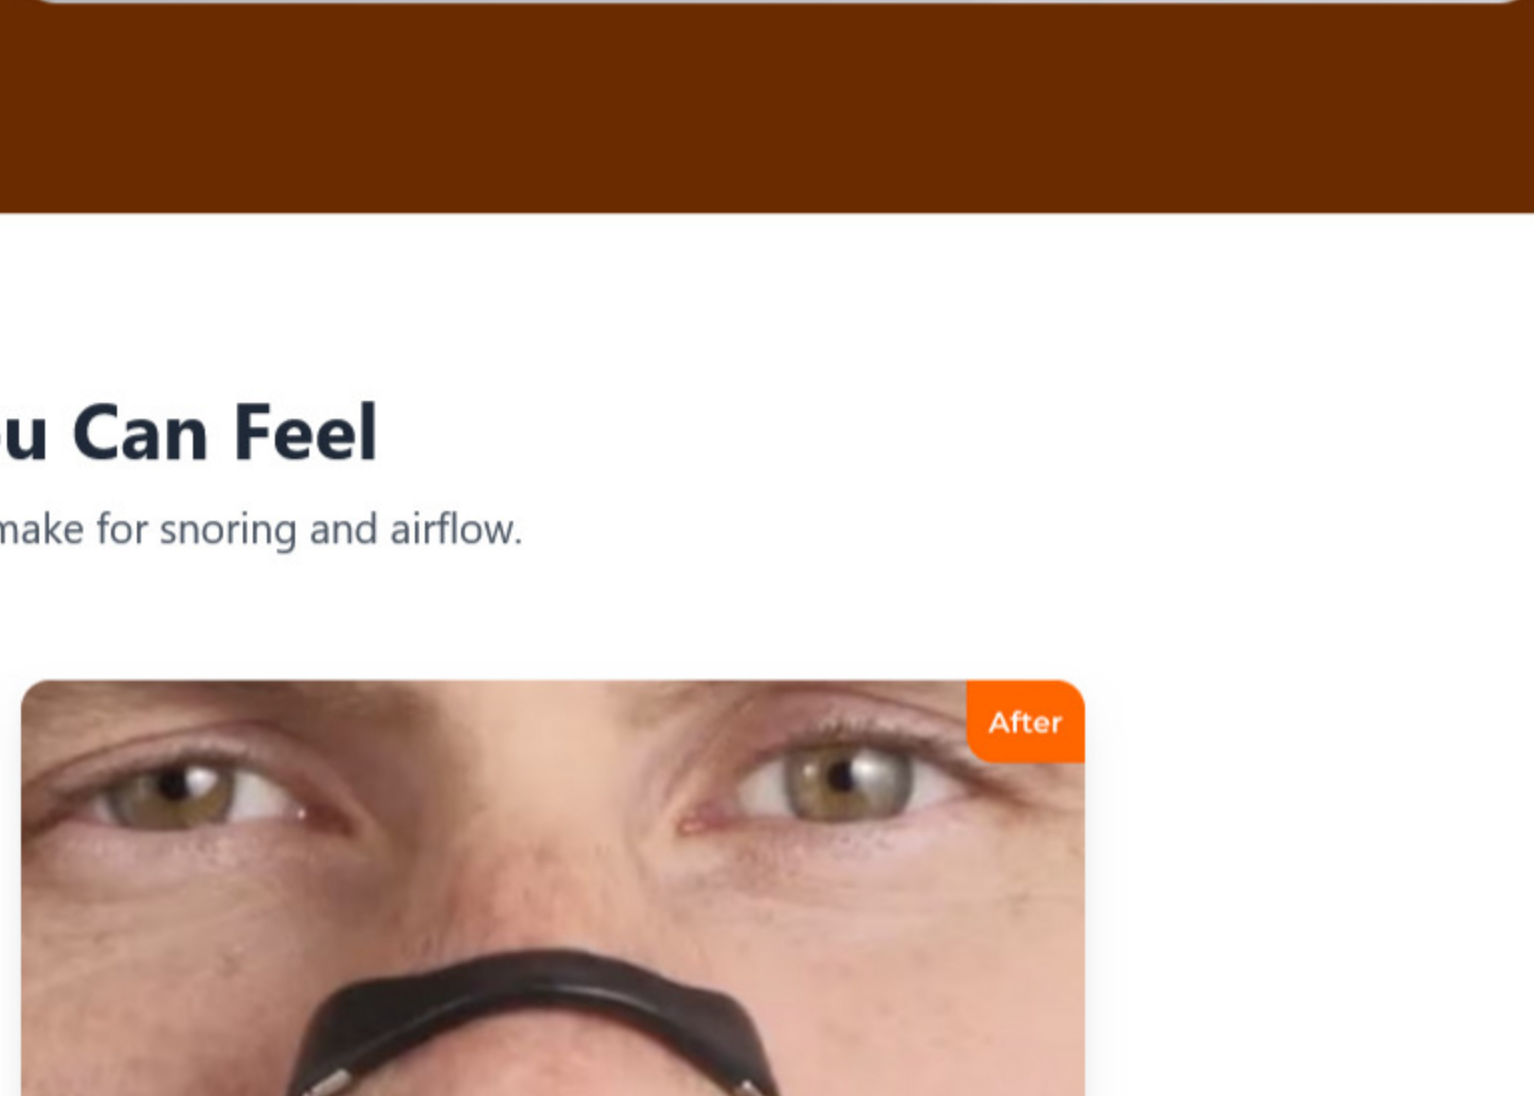

You can easily choose which works best for you.

15 or 30 Tabs

Tabls are made with 3M tape, they're safe for sensitive skin.

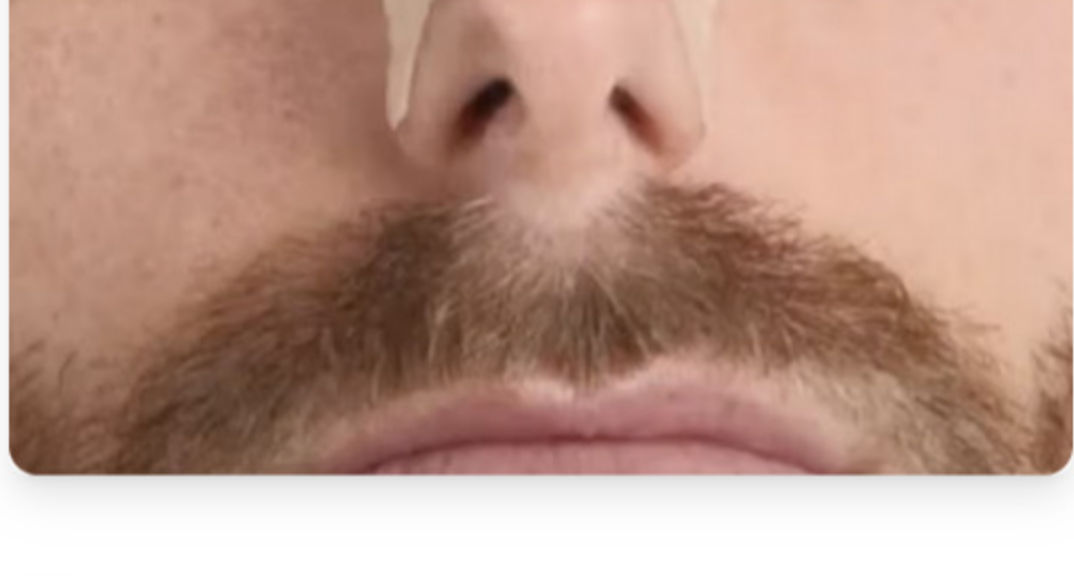

Applicator

Use magnetic Applicator to pick up and attach Tab precisely.

Real Results You Can Feel

See the difference our nasal clip can make for snoring and airflow.

- ✗ Flimsy

Nasal strips have very little structure. When you inhale, they can still collapse.
- ✗ Unsupportive

Nasal strips don't hold your nose open as wide as Intake.
- ✗ Falls off

Don't wake up with your nasal strip stuck to your pillow again.
- ✗ Hurts your skin

Nasal strips use aggressive adhesive that can irritate skin.
- ✗ Pulls forward

Nasal strips rely on the leverage of your nose bridge to widen the.

- ✓ Actually opens your nose

Intake doesn't flex, so your nose opens to the size Band you wear. We can open your nose up to 100% more.
- ✓ Durable

Intake is built strong and durable so your nose Stays open right where you want it, as long as you want it.
- ✓ Stays on all day/night

Intake will be precisely where you left it when you awaken, keeping your nasal passages open for uninterrupted breathing.
- ✓ Skin safe

Intake uses a strong magnetic Band to hold your nose open, not the bridge of your nose. We use less adhesive and we care that your skin stays where it belongs—on your nose.
- ✓ Pulls forward

Intake pulls out on your nose. Using the suction cup like Tabs, the Band.

Customer Feedback

Arlene McCoy

✓

★★★★★ | ❤️ (1.5k)

This nasal clip has helped me reduce snoring and breathe easier at night. Comfortable and barely noticeable!

1 Week Ago

Ralph Edwards

✓

★★★★★ | ❤️ (1.5k)

I use this nasal clip during my runs, and it really improves airflow. I can breathe more freely and last longer during intense sessions.

Backed by Science

Our product is backed by clinical studies that show significant improvement in airflow reduction in snoring for consistent users.

- Clinical study shows 80% improvement in nasal airflow
- 70% of users report reduced snoring after 2 weeks

Common Questions

Who is Intake for?

Everyone. If you snore, have trouble sleeping, wake up with a dry mouth, or want to boost your workouts — by Intake. Trust us. Actually, we considered ourselves pretty good at breathing through our nose—until we tried Intake, and realized there was a whole world of air out there that we didn't even know we were missing. But if you do have a history of allergies, sinus infections, a deviated septum, or anything that makes it difficult for you to breathe, Intake may help.

Will it help my snoring?
